HV GIS SUPERVISOR

80–100%

Location: Worldwide

MSIS33-E

Nice to have you here. Thank you for your interest.

I'm Ben Goepfert and I work in the division of Medium Voltage and Industrial Plants. We are an international team of more than 20 experts. Planning, installation supervision, site management and commissioning of electrical infrastructure of industrial plants are our main strengths. We are particularly proud of our assignments in the Mine Moatize, Mozambique, or that we were able to contribute our know-how to the Jura Cement factory in Wildegg (CH).

I have been supporting the MVI division for some time now and that is why I know that not only flexibility, but also openness and communication skills are important to us. You are a real asset if you possess these qualities in addition to your technical experience. We are happy to support our employees in technical - such as in personal matters as far as we can. Our values are the foundation of our company, that is why identifying with our values is very important to us. Over 10 years of experience in commissioning and project management are part of my background, how about you?

I look forward to receiving your application and getting to know you. Just give me a call if you have any questions: +41 56 552 19 07.

P.S. You can get to know more about some of the INP team here.

Exciting tasks for you:

- Provide on-site leadership during the GIS installation (110 kV–550 kV) in sub-transmission and transmission networks
- Take responsibility for on-site installation, maintenance and repair activities
- Ensure on-site quality through inspections and test protocols
- Assess project-specific risks and implement appropriate mitigation measures
- Coordinate, instruct and supervise all workforce activities on site
- Act as the interface between end customers, subcontractors and project management

How you can help us:

- Electrical or mechanical education with at least 3 years of experience in GIS installation and commissioning
- Practical experience with SF□ gas handling and DILO systems is an advantage
- Willingness to travel (up to 80% across Europe) and openness to multicultural working environments
- Good physical condition to work at heights
- Flexible and resilient team player & leadership experience
- Confident command of English, German is an advantage
- Valid work permit for Europe is required

What's in it for you?

- **Customised work time models:** Freedom in workday scheduling and work time models tailored to your lifestyle, including part-time work structures
- **Exciting projects worldwide:** Work with top clients across the globe – bringing variety and plenty of energy to your everyday work
- **Ski & chalet magic:** Hit the slopes with your team – our legendary ski weekend awaits, with almost everything included, of course.
- **You can count on a strong network:** In the INP team you can count on a network of like-minded people and advice from other experienced experts.
