Nice to have you here. Thank you for your interest.

I'm **Ben Goepfert** and I work in the division of **Medium Voltage and Industrial Plants**. We are an international team of more than 20 experts. Planning, installation supervision, site management and commissioning of electrical infrastructure of industrial plants are our main strengths. We are particularly proud of our assignments in the **Mine Moatize, Mozambique**, or that we were able to contribute our know-how to the **Jura Cement factory in Wildegg (CH)**.

I have been supporting the MVI division for some time now and that is why I know that not only flexibility, but also openness and communication skills are important to us. You are a real asset if you possess these qualities in addition to your technical experience. We are happy to support our employees in technical - such as in personal matters as far as we can. Our **values** are the foundation of our company, that is why identifying with our values is very important to us. Over 10 years of experience in commissioning and project management are part of my background, how about you?

I look forward to receiving your application and getting to know you. Just give me a call if you have any questions: +41 56 552 19 07.

P.S. You can get to know more about some of the INP team [here](#).

Exciting tasks for you:

- Act on site as the main interface between customers, authorities, subcontractors and project site personnel in all technical and administrative matters
- Ensure smooth site operations and lead construction teams on a day-to-day basis
- Execute and monitor project performance with regard to cost, schedule, technical advisory services, HSE and quality
- Ensure compliance with local regulations, standards and guidelines
- Maintain daily communication with customers, subcontractors and internal back-office teams

How you can help us:

- Degree in Electrical or Mechanical Engineering with at least 5 years of experience in site management
- Strong technical knowledge in installation and commissioning of electrical equipment, including MV/LV switchgear, transformers and gas-insulated switchgear (GIS)
- Familiarity with F-gas regulations and applicable safety standards for handling pressurised hazardous substances is an advantage
- Strong organisational skills with experience in coordinating multiple teams and understanding project scopes and requirements
- Fluent English required, German is an advantage

What's in it for you?

- **Customised work time models:** Freedom in workday scheduling and work time models tailored to your lifestyle, including part-time work structures
- **Exciting projects worldwide:** Work with top clients across the globe – bringing variety and plenty of energy to your everyday work
- **As flexible as you are:** Short or long projects, with breaks in between? We adapt to your rhythm.
- **Ski & chalet magic:** Hit the slopes with your team – our legendary ski weekend awaits, with almost everything included, of course.
- **You can count on a strong network:** In the INP team you can count on a network of like-minded people and advice from other experienced experts.
