

# ELECTRICAL COMMISSIONING ENGINEER - SUBSTATIONS

60-100%

Location: Europe

KW14-E

Nice to have you here. Thank you for your interest.

¡Hola! I'm **Matias Chacon**, Division Manager at INP Schweiz. With over 15 years of experience, both on-site and in the back office, I know exactly what matters in our projects and how to tackle things successfully. My Chilean roots? They bring a good dose of openness and joy into everything I do.

At INP Schweiz, we are true fans of long-term relationships – with our employees and our clients. **Baltic Power**, **WATL & EATL** and **Püssi - Grid Stabiliser** are just three examples of our diverse project portfolio. **Trust** and **competence** are our top values. We nurture young talents but we also value the expertise of our experienced colleagues.

Our work culture is just right for those who appreciate a healthy balance between work and personal life. Flexible working hours, respect for personal time and a great **work-life balance** are integral to us. And because I'm a passionate hockey player, I bring a lot of teamwork outside of work too – perfect for our dynamic, family-like atmosphere.

I look forward to meet with you. If you have any questions, feel free to reach out: +41 56 552 19 26

Take a look at us – you'll find some exciting stories from our team [here](#).

## Exciting tasks for you:

- Carry out commissioning of electrical power systems in HV Substations
- Perform testing of electrical BoP systems (transformers, UPS, LV/MV switchgear)
- Execute commissioning procedures in accordance with specifications and instructions
- Carry out first energizations and system start-up

## What's in it for you?

- We will support you in expanding your technical horizon and also provide hands-on technical trainings
- Focus on long term and building of your career as technical expert
- Multiple type of contractual agreements, primarily based on your preference
- Flexible and individual planning of time off depending on your needs
- Collaborate with a team of Commissioning experts of various backgrounds, share and contribute from profound technical know-how

## How you can help us:

- Experience in commissioning of substation protection systems
- Solid knowledge of IEC 61850, distance protection, transformer protection, etc.
- Know-how in commissioning of primary equipment (LV/MV switchgear, transformers, etc.)
- Willingness to be trained in additional industries (e.g. power generator, SynCons, etc.)
- Team player with a focused and independent working style
- Ability to communicate in English
- Valid work permit for Europe

- Over the last 20 years, we have grown from a handful of visionaries to more than 100 professionals
- We have kept our family spirit and look after each other
- Only well-informed employees can deliver optimal performance. That is why we regularly provide transparent information
- You can find out more about the advantages of working with INP Schweiz [here](#).
